

Boost for bodyshop

David Yeoman (left), bodyshop manager, and Adam Chuter, company accountant, by one of the five EMACS time-recording touch-screens installed at Macclesfield Motor Bodies

MACCLESFIELD Motor Bodies has installed E.M.A Computer Solutions' business manager to load and manage its 33,000sq ft facility – one of the largest independent bodyshops in the UK.

David Yeoman, bodyshop manager, said: "The EMACS

system has given me complete control of the bodyshop and, by automating many processes, and with 'status' panels displaying current information relevant to each employee's responsibilities, has made us an extremely efficient operation."

The bodyshop has 35 staff, four spraybooths and an area dedicated to repairing aluminium-bodied vehicles; current throughput is around 90 vehicles per week.
